PROFESSIONAL SUMMARY

Frontend Software Developer with strong experience building and modernizing enterprise-grade web applications using Angular. Proven track record of owning complex frontend migrations, improving performance, and delivering maintainable UI solutions in collaboration with business stakeholders. Experienced in real-time communication (WebSockets), frontend architecture, code quality enforcement, and testing. Comfortable working across the stack with Java and Spring Boot, and contributing in Agile, team-oriented environments. Motivated by clean code, scalable design, and building reliable software used in real-world systems.

WORK EXPERIENCE

Hyland

Frontend Angular Software Developer

Wrocław, Poland

May 2026 – Current

- Led the Angular output migration across a large Nx monorepo, adopting modern Angular APIs and best practices.
- Worked within an Nx monorepo, contributing to shared libraries, reusable components, and consistent development workflows.
- Implemented frontend enhancements based on business and product requirements, improving functionality and user experience.
- Resolved reported bugs across Angular application features, improving application stability and reliability.
- Refactored and cleaned up existing code to improve maintainability, readability, and long-term scalability.
- Participated in code reviews and promoted frontend best practices to maintain code quality across the application.

BNY

Software Developer

Wrocław, Poland

August 2023 – April 2026

- Led a solo migration of a large-scale Angular application from v13 to v21, significantly modernizing the codebase
- Migrated the application to Angular standalone components, adopting Signals, signal-based inputs/outputs, modern control flow (@if, @for), and inject().
- Developed new features, fixed bugs, and refactored legacy components to improve performance and readability.
- Built workflows UI along with user and admin dashboards, enabling streamlined operations and role-based application management.
- Implemented Web Socket based communication, replacing 10-second polling and improving real-time responsiveness.
- Built and maintained a mock server, removing backend dependency during development and reducing downtime by 100%.
- Improved shared components, services, and utilities, increasing team development efficiency by ~50%.
- Created custom ESLint rules, improving code consistency and reducing maintenance effort by ~50%.
- Developed reusable state management services and integrated @ngneat/until-destroy for proper life-cycle handling.
- Wrote and maintained unit tests using Jasmine, Karma, and ng-mocks, ensuring application reliability.
- Conducted code reviews, approved pull requests, and enforced front-end best practices across the team.
- Collaborated with business stakeholders to gather requirements and translate them into technical solutions.
- Supported task planning and allocation, contributing to smooth and predictable delivery.
- Created and maintained technical documentation to support development and on boarding.
- Built and maintained REST APIs using Java, Spring Boot, and Oracle DB.

Freelance

Angular Developer

Wrocław, Poland

January 2023 - August 2023

- Built and maintained a request management web application using Angular, delivering scalable and maintainable UI features.
- Integrated 50+ REST APIs, improving data accuracy and reducing manual data entry by 50%.
- Developed bulk Excel upload and AG Grid CSV export, reducing processing time from hours to minutes.
- Automated key workflows, reducing operational errors by 30%.
- Configured GitHub CI pipelines and Husky pre-commit hooks to enforce code quality and consistency.
- Implemented secure JWT-based authentication and role-based access control (RBAC).

EDUCATION

Warsaw University of Technology
M.Sc. Robotics and Automatic Control (GPA 4.69/5)

Warsaw, Poland
October 2021 - June 2023

Debre Berhan University
B.Sc. Mechanical Engineering (GPA 3.81/4)

Debre Berhan, Ethiopia
October 2015 - January 2021

SKILLS

Frontend: Angular, TypeScript, JavaScript, RxJS, AG Grid, HTML, CSS, SCSS, Bootstrap

Backend: Java, Spring Boot, Hibernate, JPA, Express.js

Database: Oracle, PostgreSQL, SQL

Tools & Technologies: WebSockets, Rest API, Nx, IntelliJ, Jira, Confluence, GitHub, Insomnia, Postman

Version Control & CI/CD: Git, GitLab, GitHub, GitLab CI, GitHub Actions

Methodologies: Agile Scrum, Unit Testing, Integration Testing, Object-Oriented Design, Technical Documentation

Testing & Quality: Jasmine, Karma, ESLint

LANGUAGE AND WORK AUTHORIZATION

Languages: English (C1), Polish (A2)

Work Authorization: Fully authorized to work in Poland. No visa sponsorship required.

LEADERSHIP / VOLUNTEER

Warsaw University of Technology
Student Ambassador

Warsaw, Poland
March 2023 - Current

- Guide campus tours and assist new students on their first day.
- Provide support during the university application process.
- Assist international students in adapting to life and studies in Poland.
- Act as a mentor and resource for international students throughout their studies.

INTERESTS AND PROJECTS

Interests: Music, Travel

Projects: Multiple Object Tracking, Image Segmentation, Image Classification

I agree to the processing of personal data provided in this document for realising the recruitment process pursuant to the Personal Data Protection Act of 10 May 2018 (Journal of Laws 2018, item 1000) and in agreement with Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation).
